MEMORANDUM FOR: Executive Director

FROM:

Director of Security

SUBJECT: Industrial Security Seminar
21-22 January 1982

1. As indicated earlier, the Office of Security is hosting the first of several planned Industrial Security Seminars at Headquarters on 21 and 22 January 1982. The attendees will represent 18 firms with a contractual relationship to the Agency. In this instance the participants are responsible for national programs sponsored by the Office of Development and Engineering (OD&E). A list of attendees is attached for your information.

2. General sessions will be held in Room GA-13 on both days and you are invited to speak to the group at the opening session on Thursday, 21 January. Thirty minutes are reserved for this purpose beginning at 0915 hours. A possible theme could include the following:

- Considerable progress has been made in the 4 years since attention was focused on industrial security as a consequence of the Boyce/Lee espionage case.

DRAFT

DRAFT

- The Industrial Polygraph Program is a noteworthy accomplishment and is believed to be a significant enhancement to our overall security program.

- The threat remains. Classic espionage efforts have increased alarmingly and with some known success. Foreign influence, even ownership, is an increasing problem. Most importantly - technology loss - recently termed "hemorrhaging" and very much a national problem. Regardless of the methodology involved; i.e., foreign espionage, industrial espionage or simply inadvertence, the resulting damage to national security is the same.

- Problems remain. The difficulties and especially the costs associated with any security program are recognized. Requirements frequently outpace formal regulations and guidelines and new guidelines invariably need to be modified or interpreted. According to the agenda, you will be dealing with several of these problems during this conference.

- Everyone associated with the CIA Industrial Security Program throughout this troubling period has been impressed and encouraged by the support and cooperation received from their colleagues in private industry.

3. The Industrial Security Seminar agenda includes a social gathering in the Executive Dining Room from 1730 to 1930 hours on 21 January, and you are cordially invited to attend.
